IRON AND STEEL ENGINEER INDEX FOR 1935

Herewith is presented the index of all authors, papers, and discussions published in the IRON AND STEEL ENGINEER for the year 1935.

A

ANGEL, H. H.—*Crane Control*, February, 1935, 90.

B

BADLAM, STEPHEN—*Developments in Flat Steel Rolling*, December, 1935, 40.
BALLENGER, W. M.—*Automatic Preset Screwdown Control*, July, 1935, 434.
BATEMAN, W. H. AND E. A. JAMISON—*Propane and Butane as Industrial Fuels*—April, 1935, 209.
BAUMGARTEN, G. W.—*Maintenance Problems on Old Cranes*, February, 1935, 102.
BAYLE, R. M.—*Automatic Screwdown Control*, July, 1935, 425.
BEAMAN, J. FRANK—*Future of Steel Industry*, September, 1935, 30.
BECHTEL, T. B.—*Control of Scale Formation in Heating Steel*, January, 1935, 26.
BECHTEL, T. B.—*Controlled Atmosphere Applications to Heating of Steel*, November, 1935, 1.
BLYTHE, W. E.—*High Temperature Conveyors, A Novel Type for Heating Furnaces*, October, 1935, 16.
BOHN, D. I.—*Recent Developments in the Welding of Aluminum Alloys*, January, 1935, 16.
BOWLES, H. J.—*Progress of Electric Welding in the Steel Industry*, May, 1935, 285.
BOYNTON, A. J.—*Use of Automatic Control on Metallurgical Furnaces*, March, 1935, 159.
BOWER, R. S.—*The Developments in the Design and Operation of Open Hearth Furnaces*, July, 1935, 413.
BURD, F. J.—*Screwdown Control*, July, 1935, 432.
BURG, J. A.—*Track Wheels—Rails—Bumpers*, February, 1935, 93.
BURR, W. H.—*Steel Mill Developments Report of A. I. & S. E. E. Committee*, September, 1935, 34.
BUSSEY, H. E.—*Lightning and Lightning Protection*, May, 1935, 301.

C

CALDWELL, G. A. AND S. F. HENDERSON—*Roll Table Equipment for Modern Wide Strip Mills*, December, 1935, 29.
CALDWELL, G. A.—*Steel Mill Applications of General Purpose Motors*, May, 1935, 294.
CARROLL, G. R.—*Crane Rails*, February, 1935, 94.
CONWAY, MARTIN J.,—*Open Hearth Control*, September, 1935, 31.

D

DANIELS, F. C. T.—*Cast Roll Progress in 1934*, January, 1935, 25.
DEROSAY, K. E. AND J. H. G. MCCONECHY—*The Generation of Power in Industry by Diesel Engines Using Heavy Fuel Oils*, May, 1935, 297.
DUNCAN, A. W.—*General Maintenance*, February, 1935, 98.
DUNKAK, E. B.—*Theory and Practice of Immersion Heating with Gaseous Fuels*, March, 1935, 167.

E

EGAN, F. D. —*Maintenance Crane Bridges and Trolleys*, February. 1935, 92.
EMMERLING, KARL—*Natural Gas in Steel Plants*, June, 1935, 337,

F

FARRINGTON, J.—*Bearings, Lubrication, Gears and Pinions, Shafting*, February, 1935, 95.
FIRST, GORDON W.—*Automatic Sheet Measuring Device*, May, 1935, 292.
FISHER, A. J.—*Automatic Control and Use of Fuels in Steel Mill Furnaces*, March, 1935, 149.
FRAUENTHAL, A. H.—*Influence of Roll Neck Deflection on Life of Anti-Friction Bearings*, June, 1935, 356.
FOLEY, EDWARD H., JR.—*Steel in Federal Projects, Billion Dollars for Steel and Allied Products*, October, 1935, 31.

G

GALE, R. F.—*Crane Safety*, February, 1935, 87.
GIRDLER, T. M.—*Economic Importance of A. I. & S. E. E. Convention and Iron and Steel Exposition*, September, 1935, 19.
GREGORY, C. V. AND F. E. HARRELL—*Individual Motor Drives for Run Out Tables and Coilers*, August, 1935, 1.

H

HANSSON, EDWARD AND B. VAN NESS, JR.—*Lightning Protection for Power Systems*, February, 1935, 73.
HARMON, G. N.—*Transportation*, January, 1935, 22.
HARRELL, F. E. AND C. V. GREGORY—*Individual Motor Drives for Run Out Tables and Coilers*, August, 1935, 1.
HARRY, R. J.—*Electric Overhead Traveling Cranes*, February, 1935, 84.
HENDERSON, S. F. AND G. A. CALDWELL—*Roll Table Equipment for Modern Wide Strip Mills*, December, 1935, 29.
HILDEBRAND, L. E. AND W. B. SNYDER—*Individual Motor Drives for Runout Tables and Coiler Rolls*, December, 1935, 16.
HITCHCOCK, J. H. —*A Self-Aligning Device for the Work Rolls of Four High Mills*, June, 1935, 354.—*Oil Flooded Bearings, Uses in Steel Rolling Mills*, November, 1935, 14.
HORNE, H. F.—*Laminated Bearings Their Use in Different Types of Rolling Mills*, November, 1935, 12.
HUGHES, GROVER A.—*Welding Developments During the Year 1934-1935*, September, 1935, 65.
HUNT, C. H.—*The Weirton Steel Company, Its History and Development*, September, 1935, 33.

J

JAMISON, E. A. AND W. H. BATEMAN—*Propane and Butane as Industrial Fuels*—April 1935, 209.

K

KEEL, J. C.—*Crane Wheels*, February, 1935, 87.
KEENER, S. F.—*Field Drawing of Roll Neck Bearings*, June, 1935, 345.
KLEIN, C. J.—*Roll Neck Bearings*, April, 1935, 238.
KULAS, E. J.—*Economic Importance of A.I. & S.E.E. Convention and Iron and Steel Exposition*, September, 1935, 18.

L

LITVIN, P. L.—*The Trend of Electrification in the Steel Plants of the U.S.S.R.*, May, 1935, 290.
LYNN, C.—*Selection of Equipment for DC Power In Rolling Mills*, August, 1935, 17.

Mc

MCCONECHY, J. H. G. AND K. E. DEROSAY—*The Generation of Power in Industry by Diesel Engines Using Heavy Fuel Oils*, May, 1935, 297.
MCDERMOTT, G. R.—*Soaking Pits*, June, 1935, 369.
MCELRAY, T. B.—*General Maintenance*, February, 1935, 97.
MCGRANAHAN, C. L.—*Flat Rolling of Steel, Factors Influencing Its Production*—December, 1935, 1.
MCKEE, ARTHUR G.—*The Development of the Modern Blast Furnace*, January, 1935, 1.

M

MACGILL, K. T.—*Composition Bearings—Recent Progress in their Use*, November, 1935, 9.
MELLON, J. J.—*Electric Controllers for Three-High Sheet Roughing Mill Screwdowns*, July, 1935, 430.
MERRICK, F. A.—*A Statement for 1935*, January, 1935, 20.
MOELLER, C. H.—*Fork Lift Electric Trucks in Steel Mills*, January, 1935, 23.
MOORE, R. W. AND E. S. REYNOLDS—*Selection of Lubricants for Cold Rolling of Strip Steel*, December, 1935, 24.

P

PALMGREN, G.—*Roll Neck Bearings*, June 1935, 347.
PETTY, D. M.—*Importance of Replacement of Obsolete Equipment in Steel Mills*, August, 1935, 10.
PFEFFER, G. C.—*Crane Motors and Gears*, February, 1935, 91.
PURNELL, FRANK—*What the A.I. & S.E.E. Spring Conference Means to the Steel Industry*, April, 1935, 227.

R

REYNOLDS, E. S. AND R. W. MOORE—*Selection of Lubricants for Cold Rolling of Strip Steel*, December, 1935, 24.
RICHARDSON, H. M.—*Composition Bearings For Roll Necks and Other Purposes*, November, 1935, 5.
ROBB, H. D.—*Maintenance of Roll Neck Bearings*, June, 1935, 342.
ROSENQUIST, B. A. E.—*Bridges and Trolleys*, February, 1935, 102.

S

SAWTELLE, E. S.—*Crane Wheels*, February, 1935, 92.
SHELDON, HARRY E.,—*An Era of Industrial Research—A Challenge to the Society*, September, 1935, 28.
SNYDER, W. B.—*General Purpose Motors for Steel Mill Applications*, April, 1935, 214.
SNYDER, W. B. AND L. E. HILDEBRAND—*Individual Motor Drives for Runout Tables and Coiler Rolls*, December, 1935, 16.
STANDING, A. J.—*Anti-Friction Bearings for Cranes*, February, 1935, 88.

T

TINNON, J. B.—*Thermit Welding*, February, 1935, 104.

U

UPTON, C. W.—*General Maintenance*, February, 1935, 96.

V

VAN CAMPEN, J. H.—*Strip Steel*, April, 1935, 239.
VAN CAMPEN, J. H.—*Wide Strip Mills*, June, 1935, 367.
VAN NESS, B. JR., AND EDWARD HANSSON—*Lightning Protection for Power Systems*, February, 1935, 73.

W

WALSH, E. I.—*New Fork Truck Speeds Operation in Tin Plate Mills*, January, 1935, 24.
WEAN, R. J.—*Flat Rolled Steel Products, Processing for Automotive Industry*, December, 1935, 12.
WECKSTEIN, S. M.—*Roller Bearing Applications, In Continuous Strip Mills and Rod Mills*, October, 1935, 23.
WEIR, E. T.—*Industrial Relations, The Association's Influence*, September, 1935, 14.

Y

YORKEY, W. R.—*Crane Control*, February, 1935, 91.
YOUNG, ARTHUR, H.—*Industrial Relations, The Human Element in Industry*, October, 1935, 11.

▲

LIST OF SUBJECTS

A

A.I. & S.E.E. Committee—Steel Mill Developments Report of—By W. H. BURR, September, 1935, 34.
A. I. & S. E. E. Convention and Iron and Steel Exposition—Economic Importance of—By E. J. KULAS AND T. M. GIRDLER, September, 1935, 18.
Aligning Device for the Work Rolls of Four High Mills—A Self—By J. H. HITCHCOCK, June, 1935, 354.
Allied Industries During the Year 1934—Electric Motors over 300 Horsepower Applied to Main Roll Drives in the Iron and Steel and—January, 1935, 33.
Allied Products—Steel in Federal Projects, Billion Dollars for Steel and—By EDWARD H. FOLEY, October, 1935, 31.
Alloys—Recent Developments in the Welding of Aluminum—By D. I. BOHN, January, 1935, 16.
Aluminum Alloys—Recent Developments in the Welding of—By D. I. BOHN, January, 1935, 16.
Anti-Friction Bearings for Cranes—By A. J. STANDING, February, 1935, 88.
Anti-Friction Bearings—Influence of Roll Neck Deflection on Life of—By A. H. FRAUENTHAL, June, 1935, 356.
Anti-Friction Bearings to Roll Necks of Steel Rolling Mills in Service—Tabulation of Applications of—September, 1935, 75.
Applications—General Purpose Motors for Steel Mill—By W. B. SNYDER, April, 1935, 214.
Applications, In Continuous Strip Mills and Rod Mills, Roller Bearing—By S. M. WECKSTEIN, October, 1935, 23.
Applications of Anti-Friction Bearings to Roll Necks of Steel Rolling Mills in Service—Tabulation of—September, 1935, 75.
Applications of General Purpose Motors—Steel Mill—By G. A. CALDWELL, May, 1935, 294.
Applications to Heating of Steel—Controlled Atmosphere—By T. B. BECHTEL, November, 1935, 1.
Atmosphere, Applications to Heating of Steel—Controlled—By T. B. BECHTEL, November, 1935, 1.
Automatic Control and Use of Fuels in Steel Mill Furnaces—By A. J. FISHER, March, 1935, 149.
Automatic Control on Metallurgical Furnaces, Use of—By A. J. BOYNTON, March, 1935, 159.
Automatic Sheet Measuring Device—By GORDON W. FIRST, May, 1935, 292.
Automatic Preset Screwdown Control—By W. M. BALLENGER, July, 1935, 434.
Automatic Screwdown Control—By R. M. BAYLE, July, 1935, 425.
Automotive Industry, Flat Rolled Steel Products—Processing for—By R. J. WEAN, December, 1935, 12.

B

Bearing Applications, In Continuous Strip Mills and Rod Mills—Roller—By S. M. WECKSTEIN, October, 1935, 23.
Bearings—Field Drawing of Roll Neck—By S. F. KEENER, June, 1935, 345.
Bearings for Cranes—Anti-Friction—By A. J. STANDING, February, 1935, 88.
Bearings—For Roll Necks and Other Purposes, Composition—By H. M. RICHARDSON, November, 1935, 5.
Bearings—Influence of Roll Neck Deflection on Life of Anti-Friction—By A. H. FRAUENTHAL, June, 1935, 356.
Bearings—Maintenance of Roll Neck—By H. D. ROBB, June, 1935, 342.
Bearings, Lubrication, Gears and Pinions, Shafting—By J. FARRINGTON, February, 1935, 95.
Bearings—Recent Progress in their Use—Composition—By K. T. MACGILL, November, 1935, 9.
Bearings—Roll Neck—By C. J. KLEIN, April, 1935, 238.
Bearings—Roll Neck—By G. PALMGREN, June, 1935, 347.
Bearings, Their Use in Different Types of Rolling Mills—Laminated—By H. F. HORNE, November, 1935, 12.
Bearings to Roll Necks of Steel Rolling Mills in Service—Tabulation of Anti-Friction—September, 1935, 75.
Bearings, Uses in Steel Rolling Mills—Oil Flooded—By J. H. HITCHCOCK, November, 1935, 14.
Billion Dollars for Steel and Allied Products, Steel in Federal Projects—By EDWARD H. FOLEY, October, 1935, 31.
Blast Furnace—The Development of the Modern—By ARTHUR G. MCKEE, January, 1935, 1.
Bridges and Trolleys—By B. A. E. ROSENQUIST, February, 1935, 102.
Bridges and Trolleys, Maintenance Crane—By F. D. EGAN, February, 1935, 92.
Bumpers, Track-Wheels-Rails—By J. A. BURG, February, 1935, 93.
Butane as Industrial Fuels, Propane and—By E. A. JAMISON AND W. H. BATEMAN, April, 1935, 209.

C

Cast Roll Progress in 1934—By F. C. T. DANIELS, January, 1935, 25
Challenge to the Society—An Era of Industrial Research, A—By HARRY E. SHELDON, September, 1935, 28.
Coiler Rolls—Individual Motor Drives for Runout Tables and—By W. B. SNYDER AND L. E. HILDEBRAND, December, 1935, 16.
Coilers—Individual Motor Drives for Run Out Tables and—By F. E. HARRELL, AND C. V. GREGORY, August, 1935, 1.
Cold Rolling of Strip Steel—Selection of Lubricants for—By R. W. MOORE AND E. S. REYNOLDS, December, 1935, 24.
Committee—Steel Mill Developments Report of A.I. & S.E.E.—By W. H. BURR, September, 1935, 34.
Composition Bearings, For Roll Necks and Other Purposes—By H. M. RICHARDSON, November, 1935, 5.
Composition Bearings, Recent Progress in their use—By K. T. MACGILL November, 1935, 9.
Continuous Strip Mills and Rod Mills, Roller Bearing Applications in—By S. M. WECKSTEIN, October, 1935, 23.
Control—Automatic Preset Screwdown—By W. M. BALLENGER, July, 1935, 434.
Control—Automatic Screwdown—By R. M. BAYLE, July, 1935, 425.
Control and Use of Fuels in Steel Mill Furnaces, Automatic—By A. J. FISHER, March, 1935, 149.
Control—Crane—By H. H. ANGEL, February, 1935, 90.
Control—Crane—By W. R. YORKEY, February, 1935, 91.
Control of Scale Formation in Heating Steel—By T. B. BECHTEL, January, 1935, 26.
Control on Metallurgical Furnaces—Use of Automatic—By A. J. BOYNTON, March, 1935, 159.
Control—Open Hearth—By M. J. CONWAY, September, 1935, 31.

Control—Screwdown—By F. J. Burd, July, 1935, 432.
Controlled Atmosphere, Applications to Heating of Steel—By T. B. Bechtel, November, 1935, 1.
Controllers for Three-High Sheet Roughing Mill Screwdowns—Electric—By J. J. Mellon, July, 1935, 430.
Convention and Iron and Steel Exposition—Economic Importance of A.I. & S.E.E.—By E. J. Kulas and T. M. Girdler, September, 1935, 18.
Conveyors, High Temperature, A Novel Type for Heating Furnaces—By W. E. Blythe, October, 1935, 16.
Crane Bridges and Trolleys, Maintenance—By F. D. Egan, February, 1935, 92.
Crane Control—By H. H. Angel, February, 1935, 90.
Crane Control—By W. R. Yorkey, February, 1935, 91.
Crane Motors and Gears—By G. C. Pfeffer, February, 1935, 91.
Crane Rails—By G. R. Carroll, February, 1935, 94.
Crane Safety—By R. F. Gale, February, 1935, 87.
Crane Statistics 1934—Electrically Operated—January, 1935, 28.
Crane Wheels—By E. S. Sawtelle, February, 1935, 92.
Crane Wheels—By J. C. Keel, February, 1935, 87.
Cranes—Anti-Friction Bearings for—By A. J. Standing, February, 1935, 89.
Cranes—Electric Overhead Traveling—By R. J. Harry, February, 1935, 84.
Cranes—Maintenance Problems on Old—By G. W. Baumgarten, February, 1935, 102.

D

DC Power in Rolling Mills—Selection of Equipment for—By C. Lynn, August, 1935, 17.
Deflection on Life of Anti-Friction Bearings—Influence of Roll Neck—By A. H. Frauenthal, June, 1935, 356.
Design and Operation of Open Hearth Furnaces—The Developments in—By R. S. Bower, July, 1935, 413.
Development of the Modern Blast Furnace—The—By Arthur G. McKee, January, 1935, 1.
Developments During the Year 1934-1935—Welding—By Grover A. Hughes, September, 1935, 65.
Developments in the Design and Operation of Open Hearth Furnaces—The—By R. S. Bower, July, 1935, 413.
Developments in the Iron and Steel Industry During the Year 1934—January, 1935, 29.
Developments in the Welding of Aluminum Alloys—Recent—By D. I. Bohn, January, 1935, 16.
Developments Report of A.I. & S.E.E. Committee—Steel Mill—By W. H. Burr, September, 1935, 34.
Device for the Work Rolls of Four High Mills—A Self-Aligning—By J. H. Hitchcock, June, 1935, 354.
Diesel Engines Using Heavy Fuel Oils—The Generation of Power in Industry by—By J. H. G. McConechy and K. E. DeRosay, May, 1935, 297.
Different Types of Rolling Mills—Laminated Bearings, Their Use in—By H. F. Horne, November, 1935, 12.
Discussion: Automatic Control and Use of Fuels in Steel Mill Furnaces—By P. C. Reichard, M. J. Conway, and W. Goehring, March, 1935, 156.
Discussion: Composition Bearings for Roll Necks and Other Purposes, Composition Bearings, Recent Progress in their Use, Laminated Bearings, Their Use in Different Types of Rolling Mills—By C. C. Pecu, F. L. Estep and L. F. Coffin, November, 1935, 16.
Discussion: Cranes—By H. W. Ball, Leroy Brooks, B. R. Shover, J. L. Young, W. E. Miller, G. R. Carroll, A. W. McAuly, R. J. Harry, J. Farrington, M. J. Conway, W. A. Marshall, February, 1935, 99.
Discussion: Development of the Modern Blast Furnace—The—By G. R. McDermott, A. G. McKee, J. C. Hopkins, B. M. Stubblefield and L. E. Riddle, January, 1935, 13.
Discussion: Developments in the Design and Operation of Open Hearth Furnaces—The—By T. J. McLoughlin, F. E. Leahy, R. S. Bower, A. J. Boynton, E. A. Hawk, M. J. Conway, W. C. Buell, Jr. and F. C. Swartz—July, 1935, 423.
Discussion: Flat Rolled Steel Products, Processing for Automotive Industry—By C. L. McGranahan, F. E. Flynn and R. J. Wean, December, 1935, 15.
Discussion: Flat Rolling of Steel—Factors Influencing Its Production—By F. E. Flynn, R. W. Graham, C. L. McGranahan, A. S. Hellstrom, R. J. Wean, J. H. Van Campen, H. D. Esterly and J. Farrington, December, 1935, 8.
Discussion: Lightning Protection for Power Systems—By W. H. Burr, F. A. Allner, J. C. Reed, L. H. Fister, B. Van Ness, Jr., A. J. Standing. E. Hansson, H. H. Angel, E. L. Anderson and H. D. Esterly, February, 1935, 81.
Discussion: Maintenance of Roll Neck Bearings—By R. S. Shoemaker, J. H. VanCampen, H. D. Robb, S. M. Weckstein, H. H. Talbot, J. H. Vohr, A. E. Miller, F. J. Thomas, A. W. Steed, J. L. Young, A. H. Frauenthal, G. Palmgren, J. H. Hitchcock, J. L. Miller, and G. S. Warren, June, 1935, 360.
Discussion: Natural Gas in Steel Plants—By F. B. Jones, H. V. Flagg, A. J. Boynton, J. L. Miller and K. Emmerling, June, 1935, 341.
Discussion: Oil Flooded Bearings, Uses in Steel Rolling Mills—By C. C. Pecu, J. H. Hitchcock, M. Stone, Myles Morgan and H. M. Richardson, November, 1935, 16.
Discussion: Propane and Butane as Industrial Fuels—By G. T. Hollett, W. H. Bateman, H. V. Flagg, C. A. Kral and C. T. Konecny, April, 1935, 213.
Discussion: Selection of Equipment for DC Power in Rolling Mills—By H. A. Winne, and G. E. Stoltz, August, 1935, 20.
Discussion: Soaking Pits—By M. J. Conway, G. D. Mantle, M. J. Bradley, L. F. Coffin, and T. J. Ess, June 1935, 371.
Discussion: Theory and Practice of Immersion Heating with Gaseous Fuels—By G. M. Coughlin, E. B. Dunkak, M. J. Conway, J. H. Strassberger, H. V. Flagg, March, 1935, 171.
Discussion: Thermit Welding—By C. Simera, L. F. Coffin, J. B. Tinnon, J. F. Gillespie, and C. O. Franklin, February, 1935, 108.
Discussion: Use of Automatic Control on Metallurgical Furnaces—By M. J. Bradley, G. M. Coughlin, M. J. Conway, E. W. Trexler and G. Fox—March, 1935, 165.
Drawing of Roll Neck Bearings—Field—By S. F. Keener, June, 1935, 345.
Drives for Runout Tables and Coiler Rolls—Individual Motor—By W. B. Snyder and L. E. Hildebrand, December, 1935, 16.
Drives for Runout Tables and Coilers—Individual Motor—By F. E. Harrell and C. V. Gregory, August, 1935, 1.
Drives in the Iron and Steel and Allied Industries, During the Year 1934—Electric Motors over 300 Horsepower Applied to Main Roll—January, 1935, 33.
During the year 1934—Developments in the Iron and Steel Industry—January, 1935, 29.
During the Year 1934—Electric Motors over 300 Horsepower Applied to Main Roll Drives in the Iron and Steel and Allied Industries—January, 1935, 33.
During the Year 1934-1935—Welding Developments—By Grover A. Hughes, September, 1935, 65.

E

Economic Importance of A. I. & S. E. E. Convention and Iron and Steel Exposition—By E. J. Kulas and T. M. Girdler, September, 1935, 18.
Electric Controllers for Three-High Sheet Roughing Mill Screwdowns—By J. J. Mellon, July, 1935, 430.
Electric Motors over 300 Horsepower Applied to Main Roll Drives in the Iron and Steel and Allied Industries, During the Year 1934,—January, 1935, 33.
Electric Overhead Traveling Cranes—By R. J. Harry, February, 1935, 84.
Electric Trucks in Steel Mills—Fork Lift—By C. H. Moeller, January, 1935, 23.
Electric Welding in the Steel Industry—Progress of—By H. J. Bowles, May, 1935, 285.
Electrically Operated Crane Statistics—1934—January, 1935, 28.
Electrification in the Steel Plants of the U.S.S.R.—The Trend of—By P. L. Litvin, May, 1935, 290.
Element in Industry—Industrial Relations, The Human—By Arthur H. Young, October, 1935, 11.
Engineer Index for 1934—Iron and Steel—January, 1935, 34.
Engines Using Heavy Fuel Oils—The Generation of Power in Industry by Diesel—By J. H. G. McConechy and K. E. DeRosay, May, 1935, 297.
Equipment for DC Power in Rolling Mills—Selection of—By C. Lynn, August, 1935, 17.
Equipment for Modern Wide Strip Mills—Roll Table—By G. A. Caldwell and S. F. Henderson, December, 1935, 29.
Equipment in Steel Mills—Importance of Replacement of Obsolete—By D. M. Petty, August, 1935, 10.
Era of Industrial Research—A Challenge to the Society—An—By Harry E. Sheldon, September, 1935, 28.
Exposition—Economic Importance of A.I. & S.E.E. Convention and Iron and Steel—By E. J. Kulas and T. M. Girdler, September, 1935, 18.

F

Factors Influencing Its Production—Flat Rolling of Steel—By C. L. McGranahan, December, 1935, 1.
Federal Projects, Billion Dollars for Steel and Allied Products, Steel in—By Edward H. Foley, October, 1935, 31.
Field Drawing of Roll Neck Bearings—By S. F. Keener, June, 1935, 345.
Flat Rolled Steel Products, Processing for Automotive Industry—By R. J. Wean, December, 1935, 12.
Flat Rolling of Steel—Factors Influencing Its Production—By C. L. McGranahan, December, 1935, 1.
Flooded Bearings, Uses in Steel Rolling Mills—Oil—By J. H. Hitchcock, November, 1935, 14.

F—(Continued)

Fork Lift Electric Trucks in Steel Mills—By C. H. MOELLER, January 1935, 23.
Fork Truck Speeds Operation in Tin Plate Mills—New—By E. I. WALSH, January, 1935, 24.
Formation in Heating Steel—Control of Scale—By T. B. BECHTEL, January, 1935, 26.
Four High Mills—A Self-Aligning Device for the Work Rolls of—By J. H. HITCHCOCK, June, 1935, 354.
Fuel Oils—The Generation of Power in Industry by Diesel Engines Using Heavy—By J. H. G. MCCONECHY AND K. E. DEROSAY, May, 1935, 297.
Fuels, Propane and Butane as Industrial—By E. A. JAMISON AND W. H. BATEMAN, April, 1935, 209.
Fuels in Steel Mill Furnaces—Automatic Control and Use of—By A. J. FISHER, March, 1935, 149.
Fuels—Theory and Practice of Immersion Heating with Gaseous—By E. B. DUNKAK, March, 1935, 167.
Furnace—The Development of the Modern Blast—By ARTHUR G. MCKEE, January, 1935, 1.
Furnaces—Automatic Control and Use of Fuels in Steel Mill—By A. J. FISHER, March, 1935, 149.
Furnaces, High Temperature Conveyors, A Novel Type for Heating—By W. E. BLYTHE, October, 1935, 16.
Furnaces—The Developments in the Design and Operation of Open Hearth—By R. S. BOWER, July, 1935, 413.
Furnaces—Use of Automatic Control on Metallurgical—By A. J. BOYNTON, March, 1935, 159.
Future of Steel Industry—By J. FRANK BEAMAN, September, 1935, 30.

G

Gas in Steel Plants—Natural—By KARL EMMERLING, June, 1935, 337.
Gaseous Fuels—Theory and Practice of Immersion Heating with—By E. B. DUNKAK, March, 1935, 167.
Gears and Pinions, Shafting, Bearings, Lubrication—By J. FARRINGTON, February, 1935, 95.
Gears—Crane Motors and—By G. C. PFEFFER, February, 1935, 91.
General Discussion: Electric Overhead Traveling Cranes—By H. W. BALL, LEROY BROOKS, B. R. SHOVER, J. L. YOUNG, W. E. MILLER, G. R. CARROLL, A. W. MCAULY, R. J. HARRY, J. FARRINGTON, M. J. CONWAY, AND W. A. MARSHALL, February, 1935, 99.
General Maintenance—By A. W. DUNCAN, February, 1935, 98.
General Maintenance—By C. W. UPTON, February, 1935, 96.
General Maintenance—By T. B. MCELRAY, February, 1935, 97.
General Purpose Motors for Steel Mill Applications—By W. B. SNYDER, April, 1935, 214.
General Purpose Motors—Steel Mill Applications of—G. A. CALDWELL, May, 1935, 294.
Generation of Power in Industry by Diesel Engines Using Heavy Fuel Oils, The—By J. H. G. MCCONECHY AND K. E. DEROSAY, May, 1935, 297.

H

Heating Furnaces, High Temperature Conveyors, A Novel Type for—By W. E. BLYTHE, October, 1935, 16.
Heating Steel—Control of Scale Formation in—By T. B. BECHTEL, January, 1935, 26.
Heating of Steel—Controlled Atmosphere Applications to—By T. B. BECHTEL, November, 1935, 1.
Heating with Gaseous Fuels—Theory and Practice of Immersion—By E. B. DUNKAK, March, 1935, 167.
Heavy Fuel Oils—The Generation of Power in Industry by Diesel Engines Using—By J. H. G. MCCONECHY AND K. E. DEROSAY, May, 1935, 297.
High Temperature Conveyors, A Novel Type for Heating Furnaces—By W. E. BLYTHE, October, 1935, 16.
Human Element in Industry, The—Industrial Relations—By ARTHUR H. YOUNG, October, 1935, 11.

I

Immersion Heating with Gaseous Fuels—Theory and Practice of—By E. B. DUNKAK, March, 1935, 167.
Importance of A. I. & S. E. E. Convention and Iron and Steel Exposition—By E. J. KULAS, AND T. M. GIRDLER, September, 1935, 18.
Importance of Replacement of Obsolete Equipment in Steel Mills—By D. M. PETTY, August, 1935, 10.
Index for 1934—Iron and Steel Engineer—January, 1935, 34.
Individual Motor Drives for Runout Tables and Coiler Rolls—By W. B. SNYDER AND L. E. HILDEBRAND, December, 1935, 16.
Individual Motor Drives for Run Out Tables and Coilers—By F. E. HARRELL, AND C. V. GREGORY, August, 1935, 1.
Industrial Fuels, Propane and Butane as—By E. A. JAMISON AND W. H. BATEMAN, April, 1935, 209.
Industrial Relations, The Human Element in Industry—By ARTHUR H. YOUNG, October, 1935, 11.
Industrial Research—A Challenge to the Society, An Era of—By HARRY E. SHELDON, September, 1935, 28.
Industries During the Year 1934—Electric Motors over 300 Horsepower Applied to Main Roll Drives in the Iron and Steel and Allied—January, 1935, 33.
Industry—Industrial Relations, The Human Element in—By ARTHUR H. YOUNG, October, 1935, 11.
Industry Diesel by Engines Using Heavy Fuel Oils—The Generation of Power in—By J. H. G. MCCONECHY AND K. E. DEROSAY, May, 1935, 297.
Industry During the Year 1934—Developments in the Iron and Steel—January, 1935, 29.
Industry, Flat Rolled Steel Products, Processing for Automotive—By R. J. WEAN, December, 1935, 12.
Industry—Future of Steel—By J. FRANK BEAMAN, September, 1935, 30.
Industry—Progress of Electric Welding in the Steel—By H. J. BOWLES, May, 1935, 285.
Influence of Roll Neck Deflection on Life of Anti-Friction Bearings—By A. H. FRAUENTHAL, June, 1935, 356.
Influencing Its Production—Flat Rolling of Steel, Factors—By C. L. MCGRANAHAN, December, 1935, 1.
Iron and Steel and Allied Industries During the Year 1934—Electric Motors over 300 Horsepower Applied to Main Roll Drives in the—January, 1935, 33.
Iron and Steel Engineer Index for 1934—January, 1935, 34.
Iron and Steel Exposition—Economic Importance of A. I. & S. E. E. Convention and—By E. J. KULAS AND T. M. GIRDLER, September, 1935, 18.
Iron and Steel Industry During the Year 1934—Developments in the—January, 1935, 29.

L

Laminated Bearings Their Use in Different Types of Rolling Mills—By H. F. HORNE, November, 1935, 12.
Life of Anti-Friction Bearings—Influence of Roll Neck Deflection on—By A. H. FRAUENTHAL, June, 1935, 356.
Lift Electric Trucks in Steel Mills—Fork—By C. H. MOELLER, January, 1935, 23.
Lightning and Lightning Protection—By H. E. BUSSEY, May, 1935, 301.
Lightning Protection—Lightning and—By H. E. BUSSEY, May, 1935, 301.
Lightning Protection for Power Systems—By B. VAN NESS, JR. AND EDWARD HANSSON, February, 1935, 73.
Lubricants for Cold Rolling of Strip Steel—Selection of—By R. W. MOORE AND E. S. REYNOLDS, December, 1935, 24.
Lubrication, Gears and Pinions, Shafting, Bearings—By J. FARRINGTON, February, 1935, 95.

M

Main Roll Drives in the Iron and Steel and Allied Industries, During the Year 1934—Electric Motors over 300 Horsepower Applied to—January, 1935, 33.
Maintenance Crane Bridges and Trolleys—By F. D. EGAN, February, 1935, 92.
Maintenance, General—By A. W. DUNCAN, February, 1935, 98.
Maintenance, General—By T. B. MCELRAY, February, 1935, 97.
Maintenance, General—By C. W. UPTON, February, 1935, 96.
Maintenance of Roll Neck Bearings—By H. D. ROBB, June, 1935, 342.
Maintenance Problems on Old Cranes—By G. W. BAUMGARTEN, February, 1935, 102.
Measuring Device—Automatic Sheet—By GORDON W. FIRST, May, 1935, 292.
Metallurgical Furnaces—Use of Automatic Control on—By A. J. BOYNTON, March, 1935, 159.
Mill Applications—General Purpose Motors for Steel—By W. B. SNYDER, April, 1935, 214.
Mill Applications of General Purpose Motors—Steel—By G. A. CALDWELL, May, 1935, 294.
Mill Developments Report of A.I. & S.E.E. Committee—Steel—By W. H. BURR, September, 1935, 34.
Mill Furnaces—Automatic Control and Use of Fuels in Steel—By A. J. FISHER, March, 1935, 149.
Mill Screwdowns—Electric Controllers for Three-High Sheet Roughing—By J. J. MELLON, July, 1935, 430.
Mills and Rod Mills—Roller Bearing Applications in Continuous Strip—By S. M. WECKSTEIN, October, 1935, 23.
Mills—A Self-Aligning Device for the Work Rolls of Four High—By J. H. HITCHCOCK, June, 1935, 354.
Mills—Fork Lift Electric Trucks in Steel—By C. H. MOELLER, January, 1935, 23.
Mills—Importance of Replacement of Obsolete Equipment in Steel—By D. M. PETTY, August, 1935, 10.
Mills in Service—Tabulation of Applications of Anti-Friction Bearings to Roll Necks of Steel Rolling—September, 1935, 75.

Use of Automatic Control on Metallurgical Furnaces—By A. J. Boynton, March, 1935, 159.
Use of Fuels in Steel Mill Furnaces—Automatic Control and—By A. J. Fisher, March, 1935, 149.
U.S.S.R.—The Trend of Electrification in the Steel Plants of the—By P. L. Litvin, May, 1935, 290.
Uses in Steel Rolling Mills—Oil Flooded Bearings—By J. H. Hitchcock, November, 1935, 14.
Using Heavy Fuel Oils—The Generation of Power in Industry by Diesel Engines—By J. H. G. McConechy and K. E. DeRosay, May, 1935, 297.

W

Welding Developments During the Year 1934-1935—By Grover A. Hughes, September, 1935, 65.
Welding of Aluminum Alloys—Recent Developments in the—By D. I. Bohn, January, 1935, 16.
Welding in the Steel Industry—Progress of Electric—By H. J. Bowles, May, 1935, 285.
Welding, Thermit—By J. B. Tinnon, February, 1935, 104.
Wide Strip Mills—J. H. VanCampen, June, 1935, 367.
Wide Strip Mills—Roll Table Equipment for Modern—By G. A. Caldwell and S. F. Henderson, December, 1935, 29.
Works Rolls of Four High Mills—A Self-Aligning Device for the—By J. H. Hitchcock, June 1935, 354.
Wheels—Cranes—By J. C. Keel, February, 1935, 87.
Wheels—Cranes—By E. S. Sawtelle, February, 1935, 92.
Wheels, Rails, Bumpers, Track—By J. A. Burg, February, 1935, 93.

Y

Year 1934—Electric Motors over 300 Horsepower Applied to Main Roll Drives in the Iron and Steel and Allied Industries During the—January, 1935, 33.
300 Horsepower Applied to Main Roll Drives in the Iron and Steel and Allied Industries, During the Year 1934—Electric Motors over—January, 1935, 33.
1934—Cast Roll Progress in—By F. C. T. Daniels, January, 1935, 25.
1934—Developments in the Iron and Steel Industry during the Year—January, 1935, 29.
1934—Electric Motors over 300 Horsepower Applied to Main Roll Drives in the Iron and Steel and Allied Industries, During the Year—January, 1935, 33.
1934—Electrically Operated Crane Statistics—January, 1935, 28.
1934—Iron and Steel Engineer Index for—January, 1935, 34.
1934-1935—Welding Developments During the Year—By Grover A. Hughes, September, 1935, 65.
1935—A Statement for—By F. A. Merrick, January, 1935, 20.
